LANDSCAPE FIRE
○○○○ PROJECT

WELCOME!

LSF2020 offers an opportunity not only for the partners to disseminate the ongoing results and progress of the activities of LIFE Landscape Fire, but also get the input on the various topics tackled by it from leading experts in the field. By making it an annual event, the partners hope to generate awareness to ongoing innovations about wildfires prevention as well as the broader issues directly or indirectly related to it.

Because of COVID-19 all the sessions will be held online through Zoom platform. Speakers should participate during discussion sessions but they could decide if they record their presentation previously.
